BY FLINT

- HIGH PRESSURE LAMINATE
- HPL ON TOP
- HDF CORE
- WEAR RESISTANCE (AC5/AC6)
- IMPACT RESISTANCE (IC4)

**CONTINUUM** is not 'JUST' any low pressure laminate; it embodies a superficial 1mm HPL (High Pressure Laminate) layer which grants the highest impact and wear resistance.

The specs that made FLINT famous are preserved: impact, scratching, fire, pressure and wear resistance.

**FLINT HI FLOOR's strength in areas where waterproof flooring is not required.**

HI-FLOOR

- HIGH PRESSURE BLOCK
- HPL INSIDE
- WEAR RESISTANCE (AC5/AC6)
- IMPACT RESISTANCE (3 X IC4)
- 100% WATERPROOF

FLINT HI-FLOOR embodies HPB technology (High Pressure Block), a unique and patented high pressure and temperature process.

The ultra-compact synthetic block offers a resistance to water, impacts and wear not seen in other products.

**FLINT HI-FLOOR is a first consideration for spaces that require 100% water resistance.**
